To Whom It May Concern:

I am writing this letter of recommendation for Dr. John Dombrowski. I have been a patient of Dr. Dombrowski's for approximately eleven months. During this time, Dr. Dombrowski has worked diligently to help me with various pain issues. He has always been very thoughtful and kind; and he is extremely knowledgeable on the options available to provide the help I have needed.

By way of explanation, I was treated by another pain management physician prior to seeing Dr. Dombrowski; the previous physician told me that nothing could be done to help me after an extremely uncomfortable session with acupuncture. I was therefore very upset and nervous that I would never find any type of pain relief. It was at this time that Dr. Dombrowski was recommended to me by my physical therapist. The first time I met with Dr. Dombrowski he was able to help relieve the low back pain that I had been experiencing for almost five years. Over the next several months he was not only able to provide longer term relief from my low back and hip pain, but he also recommended that I see another doctor who was able to determine what was causing the shoulder pain that I had suffered with for the past two years, which up to that point had not been properly diagnosed.

Throughout my association with Dr. Dombrowski, he has been nothing but pleasant, professional and very caring of my pain issues. He has never once given up trying to help me; nor at any time indicated that the problems I have were beyond help. It has been a great blessing in my life that Dr. Dombrowski has worked with me to find solutions that meet the demands of my daily life. As well, he strives to insure that I am an active participant in my treatment, so that whatever is prescribed is something I am confident is within my ability to incorporate into my life.

Dr. Dombrowski is extremely knowledgeable and well informed in his area of expertise; he has been able to recommend several options that have provided considerable pain relief. But at the same time he incorporates others in my healing process that excel in areas that he feels will ultimately provide me with the long-term help I need. I have witnessed many times that his desire for me to be helped is greater than is his desire to be the one to have to help me. I have always known that whatever his recommendation; my well being is his primary concern. His concern is also evidenced by his continued contact with the health professionals to whom he refers me. He is always aware of their treatment plan so if I need to contact him with any questions or concerns he is able to provide the answers, explanation or the reassurance that I need.

I am grateful for the opportunity to write this letter to recommend Dr. Dombrowski. I know that my life has been greatly blessed by the knowledge that he has acquired in the field of pain management, this fact has been demonstrated by the pain relief he has been able to provide. But as a physician, he has blessed me by showing great care and compassion at a time when I had no hope that I would be able to find this type of care. I can never truly express the gratitude I feel for all that Dr. Dombrowski has done to help me. I can say that anyone who has the opportunity to work with Dr. Dombrowski, in any capacity, will find as I have; that he is a physician of remarkable knowledge and talent and a person who is considerate and exuberant in his desire to help others.

Sincerely,

Patricia Lui
